## JOB TITLE

Dedicated Full Stack Web Developer with a retail background and coding expertise gained through completing a coding bootcamp program. Acquired valuable insights and hands-on experience in the field, I have applied my newfound skills to develop web pages for business clients. Solid foundation in software engineering principles, demonstrating commitment through continuous learning. Excited to apply coding skills and problem-solving acumen in a professional setting.

## TECHNICAL SKILLS

React.js · Object-Relational Mapping (ORM) · MVC · Ruby · SQL · Redux · Ruby on Rails · CSS · JS · HTML · Tailwind CSS · Object-Oriented Programming (OOP)

## TECHNICAL PROJECTS

### Recipe Share - [Github](#)

Full Stack application, providing users a platform to post their favorite recipes and a customizable user profile

- Designed front-end with React/Redux allowing separation of concerns and scalability
- Developed Rails API back-end to handle functional logic, data persistence/schema, authorize and authenticate users
- Implemented Active Record Validations ensuring accurate and valid data from user inputs
- Integrated image upload system for user profiles, amazon web services data storage bucket for production

### Movie Review - [Github](#)

User reviews on favorite movies and customization of personal profiles

- Created a back-end API with Ruby on Rails
- Build front-end with React ensuring a clean and organized frontend UI
- Utilized Active Record validations to ensure valid data was saved to the database
- Followed RESTful conventions ensuring client-server separation of concerns

### Hat Reviewer - [Github](#)

Admin-focused hat shop application allowing customization for products and reviews.

- Integrated Sinatra API to handle backend logic
- Added full CRUD implementation for Review Model
- Used React for an efficient frontend
- Utilizes Sqlite3 database to store data effectively

## EXPERIENCE

### Costco Wholesale

Modesto, CA

Merchant

06/2020 - Present

- Provide display recommendations that have resulted in an increase of 19% of sales in the Fresh Foods Department.
- Maintained warehouse layout in order to maximize efficiency and easy access to products through standardized display practices.
- Utilized on-site inventory management system to predict future customer buying trends and plan merchandise displays accordingly.
- Perform bi-annual inventory audits minimizing shrinkage and ensuring accurate inventory data.
- Train new employees in merchandising, customer service, safety and company best practices.
